BIO-MAPPER

IVD supplier in raw materials (Antigen&Antibody)
www.bio-mapper.com

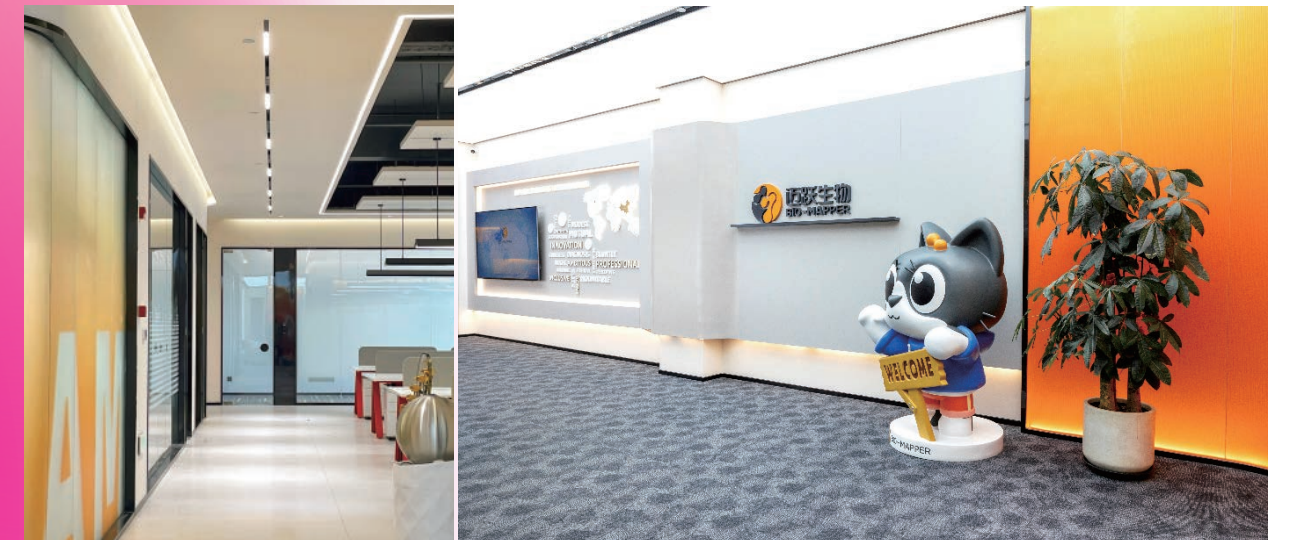

Company Profile

BIO-mapper was founded in 2018. Since its inception, the company has been dedicated to the R&D, production, sales, and servicing of bioactive raw materials for in vitro diagnostic (IVD) reagents. Our mission is to provide globally competitive core raw materials and auxiliary products to IVD manufacturers worldwide.

With exceptional product quality and premium services, BIO-mapper has earned widespread acclaim from customers and has become a trusted partner for many renowned enterprises worldwide, recognized as one of the top suppliers by its clients.

Guided by our mission—"Explore the art of living together"—BIO-mapper strives to be a deeply collaborative service partner for global IVD companies, delivering customized, one-stop solutions tailored to your needs. On our journey toward high-quality, rapid growth, we remain committed to a customer-centric philosophy, fostering win-win collaborations, independent innovation, and sustained vitality.

BIO-MAPPER

Core Advantages

CORE TECHNOLOGY PLATFORM

UTP

- Prokaryotic Expression System
- Eukaryotic Expression System
- sf19/sf20 Expression System
- Monoclonal/Polyclonal Expression System
- Recombinant Antibody Expression System
- Nanobodies Expression System
- Single B cell flow cytometry platform
- Natural Protein Extraction and Purification System
- Bioinformatics transformation technology platform

RICH AND COMPLETE APPLICATION PLATFORM

UTP

- Lateral Flow Platform
- ELISA Platform
- CMIA/CLIA Platform
- Immunoblotting Platform
- Western Blot Platform

Your Professional Partner

UTP

Commercialized large-scale production of various antigens and antibodies
Using industrial grade auto purification and physicochemical analysis systems
Having different capacity of Fermentation tank(10L,100L,300L)
Having more than 3000 m2 clean room including Class 100000 cleanroom

Professional technical support department for the development of new IVD technology and products
Providing project-based management and services, achieving company-wide coordination and fast response
Improving efficiency by in-house service teams
Supporting customers with professional technical teams

Strict and mature quality management system(ISO9001,ISO13485(TUV/B-SI))
ISO9001 and ISO13485 standards in R&D, production on quality control
Verification and maintenance of the regular equipment
Implementing 5S in the lab

Serialized antigens and antibodies with complete solution
Providing IVD Raw materials such as antigens and antibodies using different IVD Testing platform
Screening for high-specificity and high-sensitivity raw materials on different IVD Testing platform
Achieving product consistency on comprehensive testing platform
